Time Spent at the Workplace and its Effects on Relationships

A Qualitative Analysis of Relational Dynamics

By: Tara Gire (Undergraduate)
Introduction

- Relationships Require Work
- Time Spent at Work vs. Time Spent at Home
- Mental Health Research Agenda
- This study is unique because it interviews not only individuals in a relationship but couples that are in a relationship with one another.
Review of Literature

EVT (Expectation Violation Theory) (J. Burgoon, 1970)

Balance

Boundaries

Identity
Research Question

RQ 1: Do couples that spend less time at work and more time together have more successful, healthy, well-functioning relationships?

RQ 2: Do couples that spend more time at work and less time together have more successful, healthy, well-functioning relationships?
Methodologies

IRB Certification

Researcher obtained appropriate IRB Certification prior to beginning project.

IRB Board Approval for Human Subjects

Researcher obtained appropriate IRB approval from Pittsburg State University Graduate and Continuing Studies.

Subjects Selected

Subjects were selected based on categorical relevance and the sample was random. Subjects were heterosexual couples married or dating.

Interviews Conducted

Interviews were conducted at the subject’s home or workplace, recorded and later transcribed. Average interview time was eight minutes.
Demographics Utilized

• Age
• Relationship Status (Married/Dating)
• Education Level
• Level of Income
• Time Spent at Workplace (Hourly)
RQ1 was formulated to discover if couples that spent less time working and more time together had more successful relationships overall the results are indicated below.

RQ2 was formulated to discover if couples that spent more time working and less time together had more successful relationships overall, the results are indicated below.

<td>“Time spent at the workplace between the two of us but it is more of a frustration.”</td>
<td>“We share responsibilities around the house. I primarily take care of the animals.”</td>
</tr>
<tr>
<td>Source of Conflict</td>
<td>“I own my own business so my schedule is more flexible and I feel I balance it very well.”</td>
<td></td>
</tr>
<tr>
<td>Roles &amp; Responsibilities</td>
<td>“I spend a lot of extra time working and I know sometimes she gets exasperated.”</td>
<td>“Varies depending on who is home the most but I cook, do laundry, dishes, we share duties.”</td>
</tr>
</tbody>
</table>

Source of Conflict

“Time spent at the workplace between the two of us but it is more of a frustration.”

Roles & Responsibilities

“We share responsibilities around the house. I primarily take care of the animals.”
Limitations

- Limitations beyond the small sample size it does not take into account individuals that have children or amount of children each couple has.

Areas of Future Research

- Within the next eight years 75% of the workforce will be millennials. (Forbes)
- Millennials believe in integrating work life with home life.
- Balance and Boundaries will decline.
- The interview subjects described this is an important area to maintain a successful relationship.
- Research needs to be completed to predict the success of relationships among the future workforce.
Conclusions from Research

- Workplace Balance is Essential
- Individual Identity is Healthy
- Boundaries Between Work and Home
- Working Individuals Value Time Spent Outside Work
