Dear Observer:

The enclosed machine listing is a print-out of the data punched from your 1974 Breeding Bird Survey report. We hope you can take a few minutes to examine it and report to us any errors that you might find.

A change in procedure has enabled us to produce the listing earlier than in previous years. It is hoped that this quicker feedback will result in a quicker and more complete response from observers. The summary sheets have been checked against the field sheets again this year. You may find some discrepancies on the print-out which are the result of us changing the summary sheet to agree with the field sheets. If no errors are found, no communication is necessary concerning your 1974 run.

We extend to you our deepest thanks for the excellent support given to our program and look forward to an equally successful Survey next year.

Sincerely yours,

Danny Bystrak
