January Meeting Thursday, 7:00 p.m. Yates 102 Pittsburg State Univ

Jan 26 — "Black Snakes and Nesting Birds: How Studying Snakes can inform Bird Conservation" by Dr. Andrew George, Assistant Professor Biology, Pittsburg State University, will talk about his research involving the leading cause of bird mortality: nest predation by snakes - especially the W. rat snake.

To receive an e-newsletter: send your e-mail address to Cindy Ford, Editor. Jan 2017

VOLUME 2017 ISSUE 1

SOUTHEAST KANSAS MINEDLAND CHRISTMAS BIRD COUNT

The I 17th annual Audubon Christmas Bird Count is in the books (it was the 28th Minedland Count). It started with a snafu (a snafu is not a bird). Despite what we'd been told, our usual meeting place, the Express Lane in Scammon, was not open. Thank goodness the morning was relatively warm and dry so organizers could work off the hoods of cars. We may have to meet somewhere else or a different day next year. Thanks to Cindy Ford and Delia Lister for getting things off the ground. I was laid up from a shoulder inju-

ry and could not make this year's count.

The weather was quite good this year – warm, dry, clear, little wind. You'd think we would see lots of birds, but no more than usual, in fact the exact number as last year,

sixty species. While it is hard to determine what year-to-year differences may be significant there are some interesting observations. Perhaps our "best birds" were a prairie falcon, a vesper sparrow and a Lincoln's sparrow. Lots of cardinals and meadowlarks as usual, but zero red-headed woodpeckers (we saw eighteen last year). These woodpeckers are known for wide

population fluctuations, so probably this scarcity is of no consequence. No bob-whites were seen, and for some reason sightings of blue jays were down – thirty-nine (one-hundred thirty four last year). Despite all the open (unfrozen) water, few ducks were seen (some mallards and shovelers) and no kingfishers. Canada geese and pied-billed grebes were fairly common.

I'm particularly proud of the number of participants down here in our little corner of paradise – sixteen (thirteen last year), a

> mix of old faithfuls and new friends. Many thanks to all. Thanks too to Delia for her computer help sending data off to National Audubon and the Kansas

Ornithological Society. Since our counting period is always a bit late in the season KOS is

always anxious for us to get our numbers in ASAP. The names of all participants are sent to both National and KOS: Henry Arnknecht,

Mavis and Ray Benner, Wayne Bockelman, Megan Corrigan, Cindy Ford, Andy George, Collins and Joyce Haynes, Dave Henness, Lawrence Herbert, Cyndie Ivey, Delia Lister, Liz and Bob Mangile, and Emmett Sullivan. Steve Ford

Volunteers Help with Facelift

Several Auduboners and Pittsburg State University folks pulled invasive vines from around the Sperry-Galligar house at 1413 College Street on December 10°. The grounds have become overgrown over the years since our chapter's namesakes lived there, but we have gotten a start now on reclaiming the area. We will try to follow up with herbicide this spring. More work days are slated if you would be able to help for a few hours. Thanks to Wayne Bockelman, Megan Corrigan, Diane McCallum, Andy George, Cindy Ford, and Delia Lister.

Steve Ford

Board Meeting Highlights Barb Robins, Secretary

Attending: Mavis Benner, Wayne Bockleman, Megan Corrigan, Cindy & Steve Ford, Della Lister, Bob & Liz Mangile,

Diane McCallum, Barb Robins, Emmett & Ruth Sullivan.

Call To Order (Wayne): 6:00

Minutes (Barb): October's meeting read and approved. Treasurer's Report (Liz): Checking account balance of \$5.451.96

Tonight's Meeting: "Morel Mushrooms—Hunting Tips and Tricks" by Jason Manderscheid

Publicity was "spotty this week" because of the program not being confirmed till later. Posters on campus and PPL; no notice in the Morning Sun. Emmett won third place in the Kansas Native Plant Society photo contest in the flora category; we're looking forward to his submissions in the lanuary newsletter issue.

Refreshments: Mary Kata Sullivan. We still need one more volunteer for the April meeting.

Dues are still due. Last month, we had a couple of new members. 15 previous members still haven't paid.

Field Trips: The CBC will be held on December 31. Delia is presenting a raptor program at the George

Washington Carver Monument on January 21. The first annual Audubon bird count will be on January 17. Wayne is particpating—any other volunteers?

Birdseed Sale, December 3: Everything is arranged except for being short indoor volunteers; the signup sheet will circulate again tonight.

Curtains For Lab at the Natural History Reserve: Dela reported that this has been taken care of, and the fishing line disposal system has been approved.

Annual Report to Audubon: Wayne is getting ready to get ready to work on it.

Sperry-Galligar Property Cleanup: Steve announced that there will be one on Saturday, December 10, at 10:00 and invited us to participate.

Meeting adjourned at 6:50.

December Presenter: Jason Manderscheid

Morels: you either love them or really don't care. There is a passionate following, and our speaker, Jason Manderscheid, can certainly be counted in the forefront. For the rest of us, he gave much helpful information on what, how, and where to hunt.

There are seven different species of morels, and they are found around the world, especially in the Northern Hemisphere. They appear in the

early spring and can be yellow, black, white, brown, or gray.

Although very distinctive in appearance, there are similar species, such as the so-called false morels and the wrinkle thimble cap—some species can cause unpleasant symptoms if not death if eaten, so caution must be taken.

Morels prefer old-growth forests, orchards, disturbed ground, landscape beds, even your own backyard. They have a symbiotic relationship with trees and grow on their decaying matter. Some local trees that seem to be preferred are elm, cottonwood, ash, sycamore, cedar, oak, and apple.

The best time to search for morels in this area can be anywhere from mid-March through mid-May. The soil temperature needs to be around 45 to 50 degrees, with daytime highs of 70 degrees and nighttime lows of 50 degrees. A day or two of good rain will really encourage them. Even though we think of them springing up over night, it takes 20 days of growth for them to complete their life cycle. Some signs and indicators that morels may be in full swing include redbuds and lifacs in bloom, may apples growing, and box turtle and snake sightings.

Jason listed the equipment that we'll need to hunt. These include a lonfe, mesh bag or basket (better than Wal-Mart sacks), walking stick, water, boots, rain gear, and bug spray. How to hunt! Obviously, walk Around and look on the ground. Walking a spiral pattern is a good way to proceed. If the morel feels damp and firm, it is a good sign. Cut it with a knife at the bottom. Jason suggested that we look at pictures and YouTube to fix their appearance in our minds. We should look in open areas wish little sun, and always start at the bottom of a hill and work up. A favorite way of preparing morels is to sauté them in butter, but they can also be dipped in batter and deep-fried. They will last indefinitely if they're dehydrated or frozen.

Jason also brought examples of his artistic woodcarving skills accurate morel representations from four inches to over a foot high. He also creates walking sticks with a carved morel on the end.

These cold December days will not get our morel hunting fever stirred, but now we are prepared to stalk those wild 'rooms come early spring, thanks to Jason.

SUCCESSFUL BIRD SEED SALE

The Annual Sperry-Galligar Audubon Bird Seed Sale, held Sunday, December 3 at the Pittsburg Meadowbrook Mall, was a great success. The day was warm, but community members were anticipating the needs of birds in their backyards. And now many birds are being treated to seed buffets during our cold weather. Kudos to those who helped make it a success and a special thanks for Blue Ribbon Form & Home's unwavering support and use of a trailer.

Bob Mangile

Thanks very much to Mary Kate Sullivan for the refreshments at the Dec meeting.

Sperry-Galligar Audubon Society
Newsletter
816 Atkinson Ave.
Pittsburg, KS 66762
Meetings are held the last Thursday of the month. No meetings in June July, or August.
(Nov/Dec meeting date to be announced.)
7:00 pm to 9 pm, in Room 102, Yates Hall.
PSU Campus, Pittsburg, KS.
Refreshments served. Guests welcome.

Visit our website:

http://sperry-galligar.com/

Attention All

Pay membership dues in September. Please consider paying local membership dues. Our chapter receives 100% of the local dues only. HOWEVER, you can subscribe to both. Either way you get the newsletter.
