MEMORANDUM

Bird banding and censusing geographical coordinates.

372 - 0944 - Pittsburg block.

College coordinates	37° 23' N.	94° 41' W.
Paradocs coordinates	37° 24' N.	94° 43' W.
Boso coordinates	37° 22' N.	94° 46' W.
38-001 Melrose coordinates	37° 03' N.	94° 59' W.
38-002 Galesburg coordinates	37° 36' N.	95° 17' W.
38-004 Lapland coordinates	37° 52' N.	96° 21' W.
38-105 Longton coordinates	37° 18' N.	96° 06' W.

These figures are not guaranteed.

Pittsburg location on planet pinpointed

Have you ever stopped to wonder just where you are on the map of the Planet Earth?

Well, Pittsburg residents can consider their location on the planet as somewhere other than just in one of the city's four wards which are in Baker Township of the State of Kansas.

If you stand at Fourth and Broadway in Pittsburg you are exactly 37 degrees 24 minutes and 38 seconds north

latitude with zero latitude being the equator and 90 degrees the North Pole.

Thus you are about half way between the equator and the North Pole as the earth swings around on its own axis and through space around the sun.

You also would be standing at 94 degrees, 42 minutes and 17½ seconds west longitude from Greenwich, near London, England, remembering there are 360 degrees in the complete circle

about the earth with 180 of them measured east and 180 of them measures west from Greenwich.

Since each hourly belt of the earth is roughly the same as 15 degrees of longitude, Pittsburg is about six hours behind Greenwich time. Thus when it is high noon in London, it is only 6 o'clock in the morning in Southeast Kansas.
