II] Canones diversi super Thema Regium

1. Thema Regium in Canone a2, all' Unisone, per motum retrogradum
2. a2, all' Unisone
3. a2, alla Quinta, per motum contrarium
4. a2, alla Quinta, per motum contrarium et in augmentationem
5. a2, alla Quinta, per modulationem
6. Thema Regium in Fuga canonica a2

III] Ricercar a6

Note: the triptych design of the original version of the work is chiastic in the extreme: first, the opening and closing fugues are almost identical in length, and both employ the King's theme unaltered; second, the opening and closing canons of the set of six present the King's theme in canon against itself, with the King's theme virtually unaltered; within the set, the first and second are at the unison, the third and fourth, at the fifth, but by contrary motion, the fifth and sixth, at the fifth, but by parallel motion, the fifth modulating through the circle of fifths—c-g-d-a-e-b-flat-f-c, the sixth closing as a fugue in three voices, reestablishing the texture of the end of the Ricercar a3, immediately before the Ricercar a6.
